**ITB NO. 21-26 – SEPTIC HAULING SERVICES****ADDENDUM NUMBER TWO**

TO: All Bidders

Be advised of the following modification(s) & information related to Invitation to Bid (ITB) 21-26. These modifications, comments, and attachments are hereby made a part of the solicitation documents to the same extent as if bound therein.

**1. Written Questions**

#	Question	Response
1	Is the emergency price in addition to the gallon overtime price?	No, the emergency price is instead of the scheduled gallon price not in addition to.
2	On average how many days per week is hauling and how many loads per day?	The scheduled hauling from the Chapel Point Woods water filtration plant in Bel Alton is daily (7 days per week). The number of loads depends on the size of hauling tank capacity, but on average the daily volume to haul is approximately 5,500 gallons per day.
3	Is the rate based on when the call is made or when service starts- meaning if it runs into off hours will the billing cost change to that scale?	Clarification, the rate is based on when the call is made.
